

THE UNIVERSITY OF BRITISH COLUMBIA

Engineering

Your students in grades 8 through 12 are invited to attend our virtual **UBC Engineering Open House** this **Saturday, November 6!**

A degree in engineering gives students an excellent foundation to follow in the footsteps of our alumni like Bowinn Ma, the MLA for North Vancouver-Lonsdale, Andrea Palmer, co-founder of Awake Labs using technology to improve the well-being of adults with cognitive disabilities, or to work for companies like Apple, Tesla, Google and more!

If your students are ready to make an impact on our world, please encourage them to **register for the virtual UBC Engineering Open House before November 5 at 11:59pm, by going to: engineering.ubc.ca/openhouse**

Your students can look forward to:

- Live presentations
- Student experience panels
- Speaking with academic advisors from each of our 14 engineering undergraduate programs from both the UBC Vancouver and Okanagan campuses

Thank you in advance for sharing this information and helping your students discover how they can start their future at UBC Engineering – one of Canada's top engineering schools.

Best Regards,

Erin Fehr

Student Recruitment Officer

Faculty of Applied Science

University of British Columbia - Vancouver Campus
